THE POWER OF ASSETS

On one level, the 40 Developmental Assets represent common wisdom about the kinds of positive experiences and characteristics that young people need and deserve. But their value extends further. Surveys of over 89,000 students in grades 6–12 (ages approximately 11–18 years) reveal that assets are powerful influences on adolescent behavior. Regardless of gender, ethnic heritage, economic situation, or geographic location, these assets both promote positive behaviors and attitudes and help protect young people from many different problem behaviors.

PROMOTING POSITIVE BEHAVIORS AND ATTITUDES

Our research shows that the more assets students report having, the more likely they are to also report the following patterns of thriving behavior:
